

Figure 5. Scatter diagrams (MINITAB 1998) showing the abundance of selected pollen types plotted against environmental variables. Lowess curves show the locally weighted regression of the relationship of pollen to climatic variables. Lowess curves were created with a 3-step window and 0.7 degree of smoothing.

Minckley, T. and Whitlock, C. (2000) Spatial variation of modern pollen in Oregon and southern Washington, USA. *Review of Palaeobotany and Palynology* 112: 97-123.
